In the Claims

1. (currently amended) A rotating bezel wrist watch comprising:
 - a) a watch face on said wrist watch having an hour hand, minute hand and second hand connected at substantially a center [[of]] thereof and enclosed in a casing with an opening for said watch face and having wrist band fasteners;
 - b) a rotatable bezel connected to said watch face mounted on an annular shoulder of said casing surrounding said watch face so that a portion of said bezel overlaps said watch face; [[and]]
 - c) a transparent cover mounted on said casing enclosing said watch face and said bezel; and
 - d) [[c)]] means connected to said second hand for rotating said rotatable bezel along said shoulder, wherein said rotating means visibly rotates said rotatable bezel about said watch face to increase the visual attractiveness of said watch face.
2. (original) The rotating bezel watch as recited in claim 1, wherein said rotatable bezel includes a plurality of decorative elements.
3. (original) The rotating bezel watch as recited in claim 2, wherein said decorative elements are jewels.
4. (original) The rotating bezel watch as recited in claim 2, wherein said decorative elements are light emitting diodes.
5. (currently amended) The rotating bezel watch as recited in claim 1, wherein said rotating means comprises a second hand gear connected to said second hand of the wrist watch timepiece, wherein said rotating bezel is connected to said second hand gear by connecting means.

6. (currently amended) The rotating bezel watch as recited in claim 5, wherein said connecting means comprises radially extending support arms connected between said rotating bezel and said second hand gear.

7. (original) The rotating bezel watch as recited in claim 5, wherein said connecting means comprises a plurality of intermeshed gears.

8. (currently amended) The rotating bezel watch as recited in claim 1, wherein said rotating means comprises a second hand gear connected to said second hand and to an independent gear connected to said rotating bezel by connecting means.

9. (original) The rotating bezel watch as recited in claim 8, wherein said connecting means comprises support arms connected between said rotating bezel and said independent gear.

10. (original) The rotating bezel watch as recited in claim 8, wherein second hand gear is connected to said independent gear with a gear ratio greater than the gear ratio of said second hand gear.

11. (original) The rotating bezel watch as recited in claim 8, wherein second hand gear is connected to said independent gear with a gear ratio less than the gear ratio of said second hand gear.

12. (original) The rotating bezel watch as recited in claim 8, wherein second hand gear is connected to said independent gear with a gear ratio equal to the gear ratio of said second hand gear.

13. (currently amended) The rotating bezel watch as recited in claim 1, further comprising a bezel disconnect button on an underside of said casing for selectively releasing said rotatable bezel from said rotating means.

14. (canceled)
